

DURATION® Epoxy Bonding Kit

INCLUDED:

Two (2) Containers: Container "A" contains 40 ml and Container "B" contains 10 ml. This will yield enough adhesive for both sides of a 1" x 20' joint

INSTRUCTIONS:

1. Prepare surface to be joined, surface must be clean, dry and free of dust and debris.
2. Mix adhesive container "A" with Container "B" for 1 minute. Do not mix more than can be used in 10 minutes.
3. Protect adjacent surfaces with blue tape.
4. Apply adhesive on each side of pieces to be bonded.
5. Apply pressure to joint
6. Remove excess adhesive, being careful not to get excess on other surfaces.
7. Fasten if required.
8. Wait 24 hours
9. Remove tape
10. Sand horizontally (in direction of subtle grain if not fully sanded piece) with 60 grit sanding block
11. Finish paint
